

Potblack - Technical Data Sheet

Feeding Suitability

Sheep & Cattle

Potblack is a blend of cane molasses, liquid co products and Regulated Release proteins to produce a free-flowing high protein liquid which can be used in either a TMR or for de-dusting home mixes. Provides a cost-effective method of supplying protein and sugars to rations low in protein such as straw and wholecrop silage.

Suitable for all feeding systems.

Benefits include:

- Excellent low-cost feed supplying good levels of protein, sugars and energy
- Highly rumen fermentable, stimulating rumen function and greater feed efficiency
- Thorough absorption into feed to help bind and reduce sorting and dust levels
- Improve palatability to drive dry matter intake
- Addition of non-protein nitrogen provides the rumen with a source of ammonia which acts as a growth factor for the rumen microbes

Typical Feed Rates

| | Dairy | Beef | Youngstock (>3 months) | Sheep |
|-------------------------|-------|-------|------------------------|-----------|
| Feed Rate (kg/head/day) | 1 - 2 | 1 - 2 | Up to 1.0 | 0.2 - 0.3 |

Specification

| | Dry Matter Basis | As fed |
|-------------------|------------------|--------|
| Dry Matter (%) | 100 | 60 |
| Total Sugars (%) | 44 | 26 |
| Crude Protein (%) | 23.5 | 14 |
| ME (MJ/kg) | 12.3 | 7.4 |
| Oil (%) | 0.17 | 0.1 |
| Ash (%) | 25.7 | 15.4 |
| Sodium (%) | 5.7 | 3.4 |
| Crude Fibre (%) | 0 | 0 |
| DCAB (mEq/100g) | 51.25 | |

Availability:

Potblack is available in bulk from 5-29t or as mini bulk from 1-4T.
Typical specific gravity of 1.32kg/L or density of 741L/T.
