ED&F MAN EST. 1783 Liquid Products

Sheepmol - Technical Data Sheet

Feeding Suitability

Sheep

Sheepmol and Sheepmol Plus are high dry matter, high sugar blends of cane molasses, glycerine and liquid co-products specifically formulated for sheep. The unique mix of energy sources is ideal to promote healthy lamb growth and maintain ewe health. With rumen space restricted in late pregnancy, liquid feeds are unique in having a low substitution rate allowing feed intakes to be maintained, reducing the risk of metabolic disorders. Sheepmol Plus provides all the benefits of Sheepmol with the added inclusion of a trace element and vitamin pack. Suitable for use in all feeding systems.

Benefits include:

- Extra energy boost from feeding sugars and glycerine
- Glycerine is a glucose precursor, particularly helpful in supporting milk production and colostrum quality
- Ad-lib feeding reduces stress for sheep and saves time for the shepherd
- Highly palatable and improves intake and forage digestibility
- Balances variations in grazing/forage quality and quantity

Typical Feed Rates

	Sheep
Feed Rate (kg/head/day)	0.25

Typical Specification

	Dry Matter Basis	As fed
Dry Matter (%)	100	69
Total Sugars (%)	48	33
Crude Protein (%)	7	5
ME (MJ/kg)	13.5	9.3
Oil (%)	0.14	0.1
Ash (%)	15	10.4
Sodium (%)	3.5	2.4
Crude Fibre (%)	0	0

Vitamin and Mineral Pack Specification

Vitamin	Inclusion (IU/kg)
Vitamin A	42000
Vitamin D3	8000
Vitamin E	150

Mineral	Inclusion (mg/kg)
Cobalt	3
Iodine	20
Manganese	400

Mineral	Inclusion (mg/kg)
Zinc	400
Selenium	2.5

Availability:

Sheepmol is available in bulk from 5-29t or as mini bulk from 1-4T. Typical specific gravity of 1.35kg/L or density of 741L/T.

Product shelf life is 6 months

However, vitamins present in Sheepmol Plus at least until 3 months from date of manufacture.
