

# Glycopro - Technical Data Sheet

## Feeding Suitability

Cattle

Glycopro is a high energy blend of cane molasses, glycerine and Regulated Release proteins. At 18% protein as fed it is designed to produce an ideal balance of fermentable energy and rumen degradable protein to be fed alongside low protein forages or grass silage in a TMR. The addition of glycerine to the molasses based liquid feed stimulates glucose production which is key for effective metabolism in high performing cattle. It has been shown to improve milk production and carcass composition.

Glycopro is suitable for all feeding systems.

### Benefits include:

- High nutrient density providing a rich source of sugars, protein and energy
- Supports milk production in the first 100 days of lactation
- Provides an extra source of propionate in the rumen, saving amino acids for protein synthesis
- High in dry matter to help bind feed, reducing sorting and dust
- Addition of non-protein nitrogen provides the rumen with a source of ammonia which acts as a growth factor for the rumen microbes

### Typical Feed Rates

	Dairy	Beef	Youngstock (>3 months)
Feed Rate (kg/head/day)	1 - 3	1 - 2	Up to 1.0

### Specification

	Dry Matter Basis	As fed
Dry Matter (%)	100	67
Total Sugars (%)	43	29
Carbohydrate (%)	12	8
Crude Protein (%)	27	18
ME (MJ/kg)	14.1	9.5
Oil (%)	0.5	0.3
Ash (%)	10.1	6.8
Sodium (%)	0.1	0.07
Crude Fibre (%)	0	0

### Availability:

Glycopro is available in bulk from 5-29t.

Typical specific gravity of 1.32kg/L or density of 755L/T.
